Pincher Creek SEARCH

and Rescue

“That Others May Live”

Call for Volunteers

What we do

Search and Rescue in Alberta is performed by trained, dedicated volunteers. People just like you!

Pincher Creek Search and Rescue has been around since 1995.

We respond to calls to help lost, injured and imperiled people.

We search for and help

- *The child that has gotten lost from their campsite.*
- *The mountain biker that's taken the wrong turn.*
- *The Alzheimer sufferer who's wandered away.*
- *The suddenly missing child in the urban setting.*

We rescue

- *The hunter who's had an injury.*
- *The snowmobiler stuck when the big storm comes in.*

We assist

- *People caught in disasters (such as floods, wild fires, tornados)*

Most of our responses are within 50 km of Pincher Creek. But we've supported other teams as far away as Red Deer.

We need your help!

By joining our team you will help us to continue to meet the search and rescue needs of our community.

Searches require many trained people to reach the lost or injured person in a timely fashion. When a search carries on into the second day, even more people are needed. Pincher Creek Search and Rescue owes its success to the large number of people like you who volunteer and are ready to help.

We will provide training in the many areas of search and rescue to make you an effective part of our team.

If you already have experience in any of these related skills, we especially ask for your help:

- *Detailed Knowledge of our Local Back Country Areas*
- *Mountain Snowmobiling*
- *Technical Rope Rescue*
- *Emergency Response Leadership*
- *Volunteer Organization Management*

Everyone welcome!

There's a role for everyone in search and rescue!

If you have the energy, fitness and drive to spend time in the wilderness searching during bad weather, we need you!

If you can help out when the environment is a bit tamer, we also need you!

If you don't really seei yourself leaving the road, there's lots of jobs at the command post! – radio communications, logistics, overhead planning, etc. Our family liaisons support the lost person's family.

If you can't leave your home, do we have a job for you! Our call-out personnel use their home phone to coordinate getting everyone to the search.

If you can't have emergencies interrupting your commitments, we still need you! All the jobs that make a volunteer organization like ours a success are open to you. E.g. Training Coordination, Equipment Management, Membership Recruitment, Fund Raising, Board Leadership.

Our success has been built on including volunteers just like you. We can work with your assistance in the ways and to the degree that you can offer it.
