

# NAVIGATION

- THE ART OF KNOWING WHERE YOU ARE  
IN RELATION TO WHERE YOU ARE GOING  
AND WHERE YOU HAVE BEEN

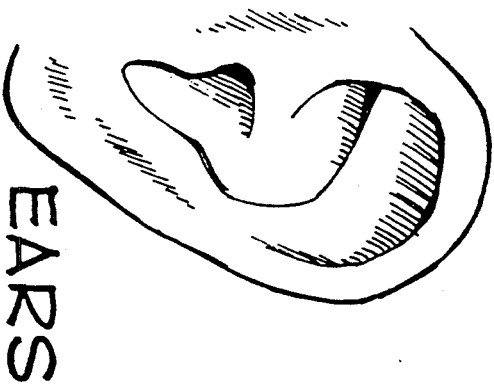

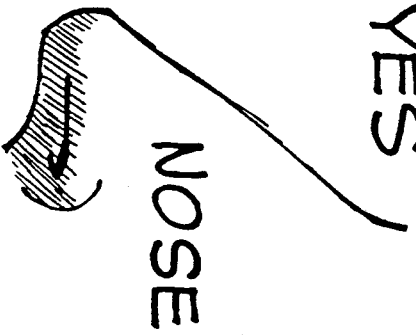

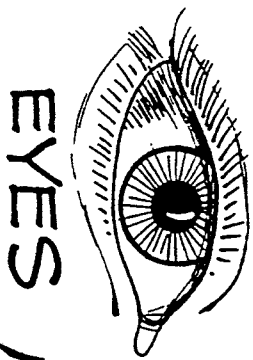

*Being lost is not a threat  
to life in itself. But staying  
alive long enough to get  
unlost, can be a real threat.*

**YOUR EXACT POINT POSITION BECOMES  
CRITICAL WHEN YOU NEED HELP QUICKLY**

e.g. a house fire, an injured person, a heart attack.

**COULD YOU DIRECT A DOCTOR TO THIS ROOM ?**
