Subject : [PCSAR-Members] Eagle Plume post incident

Bryan Sundberg writes:

Can I ask another member to take over from Bryan the oversight of the post operations for the Eagle Plume search?

This is an "oversight" role, which means you take the Post Operations Check List which Bryan has been working on and delegate work to various members and volunteers. You recruit people to take on those tasks. You keep track of who's doing what and follow up to make sure things have been completed. You collect and organize the final paperwork. This role probably involves a few hours over the next couple of weeks.

If you have extra time, you could take on one of the specific items from the check list and work on it yourself, but doing so is not an expectation of this role.

This is a good role for anyone who is a search manager or wants to become a search manager or who participates in the Preplan Committee or who just wants to help out.

If no one responds by Tuesday evening, I'll take on this role myself. I have limited time available to SAR for the next couple of weeks, so this would unfortunately mean a delay or redelegation of the other work I'm doing on this incident.

Incidentally, the critique hasn't been scheduled because no one has stepped forward yet to chair it and create the critique report. If you are willing, please let me know and I'll forward your message to whoever agrees to take on the oversight role.

Take Care,
